[CHARLESTON, SC – 01/09/2009] eLifespaces will be conducting eight new continuing education for design and building professionals in 2009. Mikell Murray, eLifespaces' COO and certified instructor, will be offering these classes as they are released by the Certified Electronic Design & Installation Association (CEDIA). "As electronic systems continue to grow in popularity, it's increasingly important for design and build professionals to be aware of the capabilities homeowners are demanding," said Murray. "CEDIA's ROI courses offer key information that can help increase participants understanding of how these systems fit into today's home."

Courses to be introduced throughout 2009 include: Hiding Technology; Building Quiet Environments; Home Integration for Convenience, Comfort, and Safety; Structured Wiring for the Integrated Home; Understanding the Need for Home Technology; Home Audio Made Easy: Residential Speaker Solutions; Home Technology Within the Design and Build Process; Home Theater Design and Construction; Lighting Control; Managing Electronic Systems Contractors; and Planning for Residential Electronic Systems.

AIA and AIBD members who attend ROI-administered classes can receive continuing education credits (CEUs).

**About CEDIA & Register Outreach Instructors**

CEDIA is an international trade association of companies that specialize in designing and installing electronic systems for the home. The association was founded in September 1989 and has more than 3,500 member companies worldwide. CEDIA Members are established and insured businesses with bona fide qualifications and experience in this specialized field. The goal of the ROI program is "to raise awareness of our industry and CEDIA within residential building channels by empowering our members to deliver a consistent message through relevant high quality education while upholding the highest standards". For more information on CEDIA, visit the association's web site at [www.cedia.org](http://www.cedia.org).

**About eLifespaces**

Providing contracting, security and audio visual (A/V) services over two decades, the company directors and technical practitioners hold multiple licenses and certifications in the construction, low voltage cabling, electronic, security (both fire & burglar), and electrical contracting. As Design & Installation Contractors, their goal is to make the technology in your lifespaces – intuitive, invisible, and incredible. Whether its videoconferencing, ISF® Video Calibration, THX® Certified room construction, HAA® acoustic calibration or any number of other specialized requirements, let their team of Industry Certified Professional Designers and Practitioners address your technology needs. eLifespaces holds many industry awards, the most recent of which was winner in the Consumer Electronics Associations Mark of Excellence Awards in multiple categories. Find eLifespaces online at [www.elifespaces.com](http://www.elifespaces.com).
